(54) Title: MEDICAL DEVICE RADIOFREQUENCY IDENTIFICATION SYSTEM AND METHOD

(57) Abstract: A medical device inventory management system, including one or more radiofrequency identification (RFID) transponder or "tag" associated with one or more medical devices or attached to the medical device packaging. One or more RFID readers may be used, which may take the form of a handheld device or a shelf or shelving system for holding medical devices, or a handheld device may be used in conjunction with a shelving system. The RFID reader communicates automatically with a computer or computer network, providing such information as inventory status, whether a specific medical device is present in inventory, inventory amount of medical devices, etc.
